One axis for the generational and Noah circles

2756 BC · The midpoint of Creation to Conquest, 4106–1406 BC

Reading the common center

The inner pair moves 150 years later: its original crossing at 2906 BC aligns with Noah’s 2756 BC crossing.

Rose dates include this shift. All four pairs reflect across the dashed axis. Read elapsed years along the curves.

Full circles

2,200 years per circle

D = 700 years

Outer semicircles

1,100 years per arc

D = 700 years

Inner semicircles

1,100 years per arc

400 + 400 about the center

Noah semicircles

1,650 years per arc

300 + 300 about the center

Before alignment the inner arcs run from Jared (3606) to Peleg (2506) and from Terah (2206) to Methuselah (3306 BC).

Noah’s regular Rounded MT dates: 4106 → 3056 → 2456 → 1406 BC. His 1,050-year diameter gives the 600-year overlap.
