The generational circles and Noah’s Flood

4106–1406 BC · The 27-century reconstruction includes second Cainan.

Full circles

2,200 years each

- **Adam to Isaac’s close**
  4106–1906 BC
- **Moses to Jared’s opening**
  1406–3606 BC

Outer semicircles

1,100 years each

- **Adam to Shem’s close**
  4106–3006 BC
- **Moses to Peleg’s close**
  1406–2506 BC

Middle semicircles

1,100 years each

- **Jared opens → Peleg closes**
  3606–2506 BC
- **Terah opens → Methuselah closes**
  2206–3306 BC

Noah’s semicircles

1,650 years each · regular Rounded MT

- **Creation to the Flood**
  4106–2456 BC
- **Conquest to Noah’s birth**
  1406–3056 BC

Reading the geometry

The curves share a BC axis. Each horizontal span measures elapsed years along the modeled arc or circumference.

At π ≈ 22/7, a 700-year diameter gives a 1,100-year semicircle and a 2,200-year circumference.

Noah’s 1,050-year diameter gives a 1,650-year semicircle. The two spans overlap for his 600 years to the Flood.

Rounded MT gives 1,050 + 600 + 1,050. On Actual MT Gear 2, 4114 → 3058 → 2458 → 1406 BC gives 1,056 + 600 + 1,052.
