The Rounded MT Trunk across the Mirror

From cumulative Creation to Christ at 6 BC. A half-turn about zero carries each construction to its mirror.

9,900 / 7,000 = 99/70
Square diagonal / side ≈ √2

11,000 / 7,000 = 11/7
Semicircular arc / diameter ≈ π/2

MAP LAYERS

- Creation triangle · base 9,900
- Square · side 7,000
- Creation–Jared semicircle
- MT and Gospel circles

PROPOSED TRIANGLES

- Creation–Christ
- Jared–Jared
- Compass transfer to Cainan

Both placements have a 14,000 base.

Elapsed years from cumulative Creation

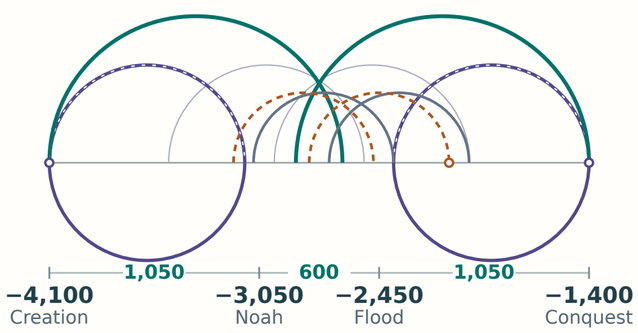

Corresponding intervals on the mirrored side

- 7,000 to Luke’s Jared — 7,000
- 9,900 to regular MT Creation — 9,900
- 11,000 to schematic Arphaxad — 11,000

0

The 2,700-year MT span

Enlarged detail of the Creation-to-Conquest span on the negative side.

- Full turn 2,200 · upper half 1,100
- Noah semicircles 1,650
- Shelah pair · center year −2,750
- Cainan pair · center year −2,850

Each inner semicircle traces 1,100 years.
Years on the curves measure arc travel.
The ruler measures time from Creation.

Across the Mirror

The same ruler locates the Gospel counts and the two compass endpoints.

Luke’s Adam → Matthew’s Abraham	−7,500 → +4,000	11,500
Cainan omitted · Jeconiah doubled	−7,400 → +4,100	11,500
Luke’s Jared → mirrored Cainan	−7,000 → +2,900	9,900
Luke’s Jared → mirrored Shelah	−7,000 → +2,800	9,800

The 100 years between Cainan and Shelah distinguish the two endpoints.
Schematic Enoch at −3,500 to Luke’s mirrored Adam at +7,500 spans 11,000.
