Peleg and Moses on the same Mirror ruler

Two projected Creation points reach corresponding boundaries eleven schematic generations apart.

Elapsed years from each Creation

With LXX Creation fixed

−5,500 → +1,400 = 6,900

−5,500 → +1,500 = 7,000

With the mirrored Conquest fixed

−5,500 → +1,400 = 6,900

−5,600 → +1,400 = 7,000

6,900 × 70/69 = 7,000. Each reading assigns the same 100-year gain to one endpoint.

Signed years from 6 BC · 27-name century scheme, Peleg #16 and Moses #27 · Genesis 10:25 and 11:1–9
