Eight curves at 2756 BC

Successor boundaries · Crossings aligned · 27 schematic generations with second Cainan

Each mark is a dated point on its curve. Filled dots mark century boundaries and open dots mark midpoints.

Curve	Forward in time · BC	Backward in time · BC	Arc years
Full circle	4106 Adam opens → 1906 Isaac closes	1406 Moses closes → 3606 Jared opens	**2,200**
Outer semicircle	4106 Adam opens → 3006 Shem closes	1406 Moses closes → 2506 Peleg closes	**1,100**
Inner semicircle	3506 Enoch opens → 2406 Serug opens	2006 Abraham closes → 3106 Noah closes	**1,100**
Noah semicircle	4106 Creation → 2456 Flood	1406 Conquest → 3056 Noah born	**1,650**

The inner pair is lowered 10.607 units to meet Noah’s pair at the gold diamond on the axis. The other two diamonds lie on the full circles.

One unit equals one year of travel along a curve. Exact diameters are 2,200/π ≈ 700.282 and 3,300/π ≈ 1,050.423. The 22/7 model gives 700 and 1,050.

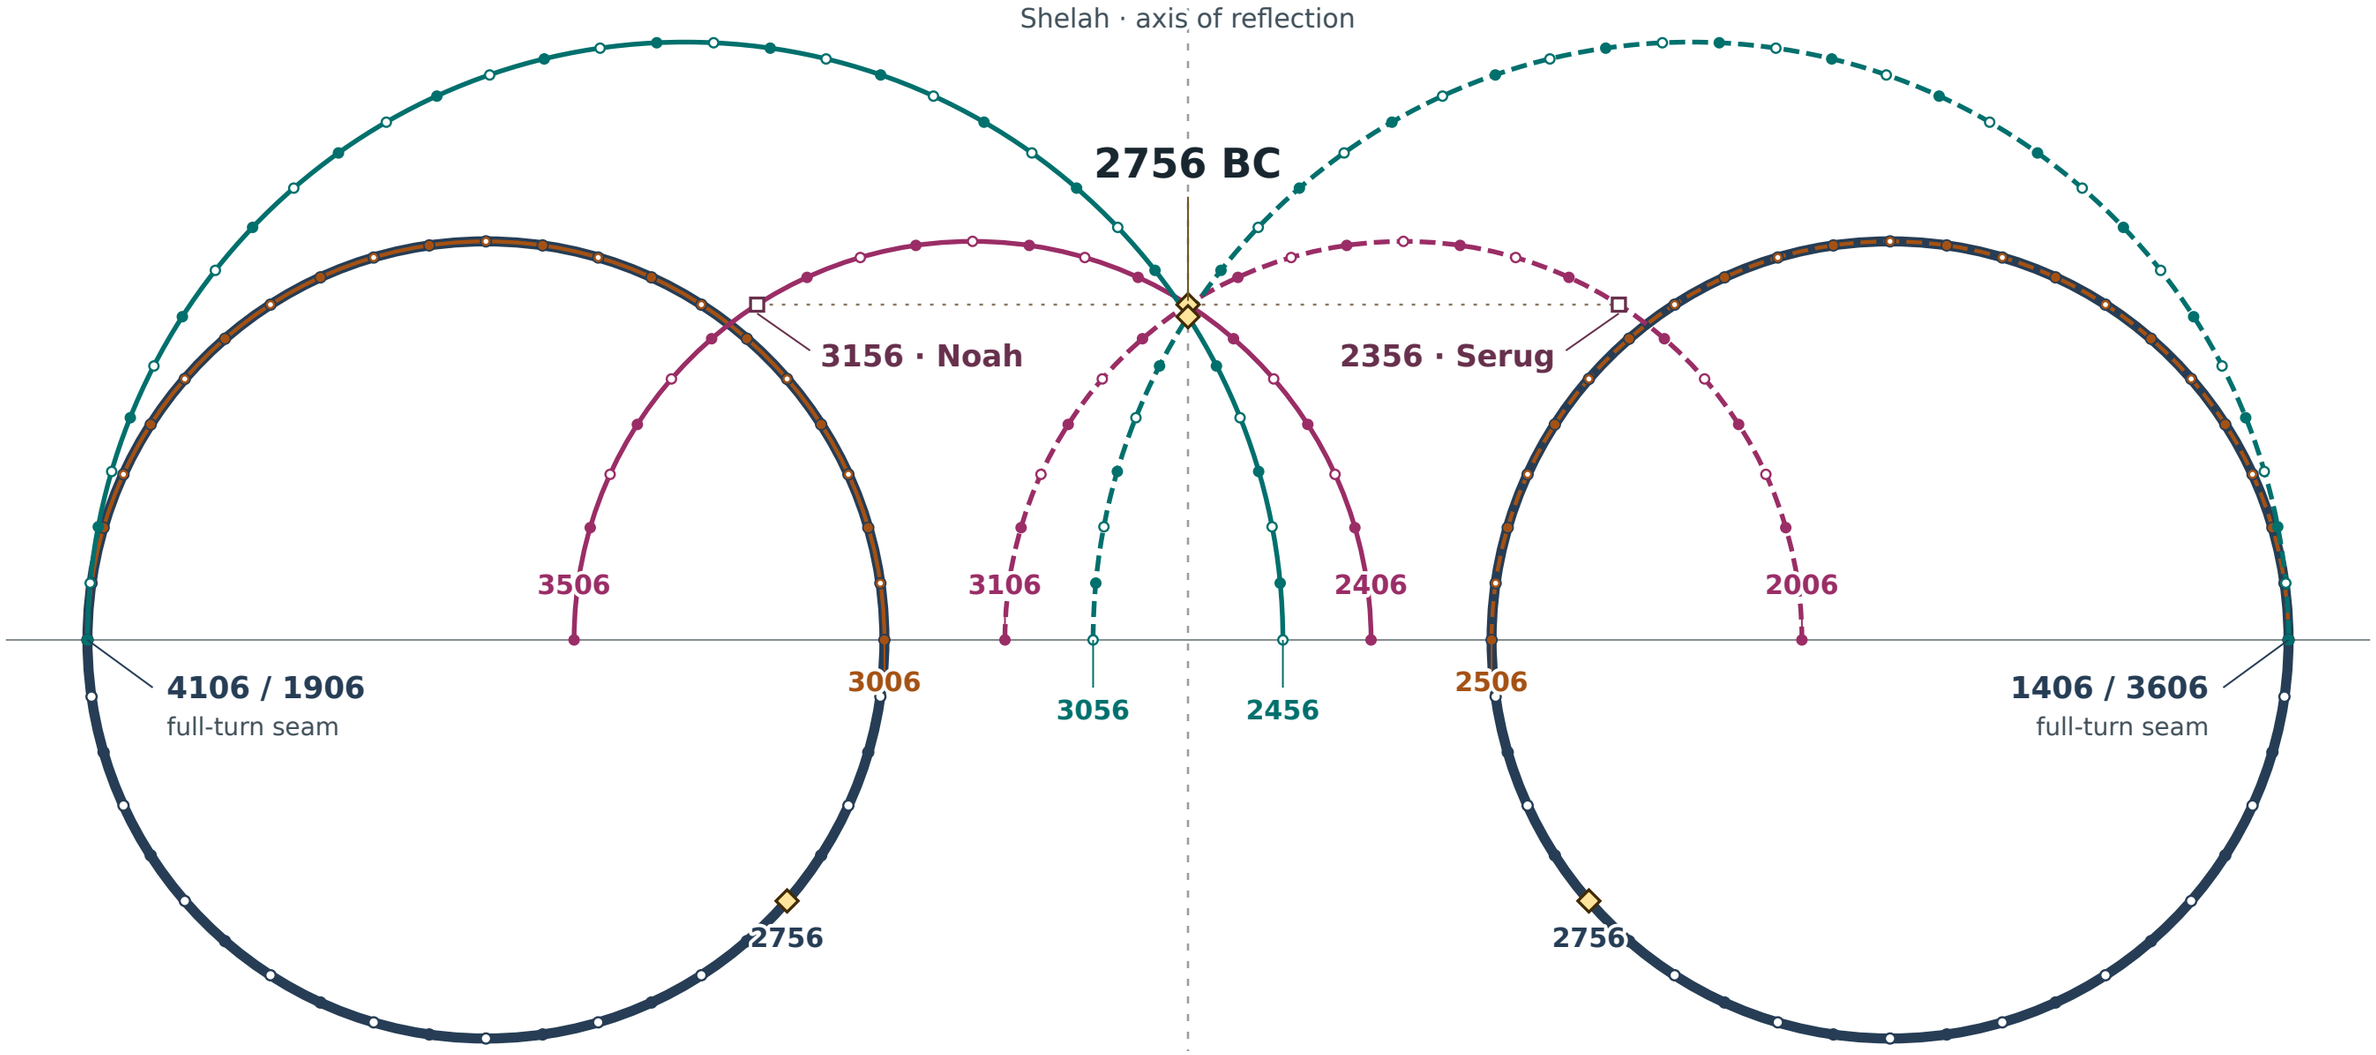

Each outer semicircle retraces the first half of its full circle. Dates on Noah’s pair use the regular Rounded MT Creation, birth, Flood and Conquest anchors.

The dotted chord joins the schematic midpoints of Noah, Shelah and Serug. Each side measures 400 years along its arc and 378.601 units along the chord.

Eight curves at 2756 BC

Successor boundaries · Common baseline · 27 schematic generations with second Cainan

Each mark is a dated point on its curve. Filled dots mark century boundaries and open dots mark midpoints.

Curve	Forward in time · BC	Backward in time · BC	Arc years

Noah semicircle	4106 Creation → 2456 Flood	1406 Conquest → 3056 Noah born	**1,650**

On one baseline, the 2756 BC crossings lie at 294.557 units for the inner pair and 283.951 for Noah. The gap is 10.607 units.

One unit equals one year of travel along a curve. Exact diameters are 2,200/π ≈ 700.282 and 3,300/π ≈ 1,050.423. The 22/7 model gives 700 and 1,050.
