Two semicircles across six full generations

Adam to Arphaxad and Moses back to Peleg on the 27-name schematic. Arc lengths use 22/7 for π.

Solid and dashed arcs use opposite edges of the century bands. Every matching point between the edges keeps the same ratio.

The SP and LXX Mirror

Projected SP −4,400 to mirrored Peleg

+2,600 opening · +2,550 midpoint · +2,500 close

Projected LXX −5,500 to mirrored Moses

+1,500 opening · +1,450 midpoint · +1,400 close

Both distances run from 7,000 through 6,950 to 6,900. Christ at 6 BC is coordinate 0.
