SP and LXX on the Rounded MT backbone

Schematic centuries from Creation to Moses and the Conquest, with Christ at 6 BC as zero.

The same three spans from two Creation points

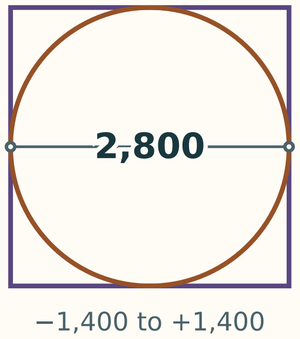

Align the rulers by elapsed years. Every signed coordinate on the lower ruler is 8,500 years later.

Alternate LXX reading −5,600 → +1,400 also spans 7,000. Shifting both endpoints 100 to the left reaches Moses’ mirrored close at the Conquest.

Two inscribed circles at the same drawing scale

Using 22/7 for π, the diameter, circle circumference and square perimeter all increase by 5/4.
